| 4. FIRST AID MEASURES | | |
|-----------------------|--|--|
| General | : In all cases of doubt or when symptoms persist, get medical attention immediately. | |
| | DO NOT give anything by mouth to an unconscious person. | |
| Inhalation | : Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is irregular | |
| | or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. | |
| | Give nothing by mouth. If unconscious place in recovery position and seek medical advice. | |
| Skin contact | : Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water or | |
| | use recognised skin cleanser. Do NOT use solvents or thinners. | |
| Eye Contact | : Check for and remove any contact lenses. Immediately flush eyes with running water | |
| | at least 15 minutes, keeping eyelids open. | |
| Ingestion | : If swallowed, seek medical advice immediately and show the container or label. | |
| | Keep person warm and at rest. Do not induce vomiting. | |

5. FIRE - FIGHTING MEASURES

| Extinguishing Media | : Recommended: alcohol resistant foam, CO2, powders, water spray. Not to be used : waterjet. |
|---------------------|---|
| Recommendations | : Fire will produce dense black smoke. Exposure to decomposition products may cause a health |
| | hazard. Appropriate breathing apparatus may be required. Cool closed containers exposed to |
| | fire with water. Do not release runoff from fire control methods to sewers or waterways. |

6. ACCIDENTAL RELEASE MEASURES

| : Exclude sources of ignition and ventilate the area. Avoid breathing vapour or mist. |
|---|
| Refer to protective measures listed in sections 7 and 8. |
| : Contain and collect spillage with non-combustible absorbent materials e.g. diatomaceous earth, |
| sand, vermiculite and place in container for disposal according to local regulations (see section 13) |
| Do not allow to enter drains or watercourses. Clean preferably with a detergent; avoid use of solvents. |
| If the product contaminates lakes, rivers or sewage, inform appropriateauthorities in accordance with |
| local regulations. |

7. HANDLING AND STORAGE

| Handling | : Keep container tightly closed. Keep away from heat, sparks and flame. |
|----------|--|
| | No sparking tools should be used. Avoid contact with skin and eyes. Avoid the inhalation |
| | of dust, particulates and spray mist arising from the application of this preparation. |
| | Avoid inhalation of dust from sanding. Eating, drinking and smoking should be prohibited |
| | in area where this material is handled, stored and processed. |
| | Workers should wash hands and face before eating, drinking and smoking. |
| | Put on appropriate personal protective equipment (see Section 8). |
| | Never use pressure to empty the container because the container can not resist the pressure. |
| | Always keep this products in containers that made with same material as the original one. |
| | Comply with the health and safety at work laws. |
| | Vapors of this product are heavier than air and may spread along floors. |
| | Prevent flame by control the vapor concentration under Occupational Exposure Limits. |
| | In addition, the product should only be used in areas from which all naked lights and other |
| | sources of ignition have been excluded. |
| | Electrical equipment should be protected to the appropriate standard. |
| | To dissipate static electricity during transfer, earth drum and connect to receiving container |
| | with bonding strap. Operators should wear anti-static footwear and clothing. |
| | The floors should be the conducting type. |
| | When operators, whether spraying or not, have to work inside the spray booth, ventilation is |
| | unlikely to be sufficient to control particulates and solvent vapor in all cases. |
| | In such circumstances they should wear a compressed air-fed respirator during the spraying |
| | process and until such time as the particulates and solvent vapor concentration has fallen below the |
| | exposure limits. |
| Storage | |
| | : Store in accordance with local regulations. Observe label precautions. |
| | Store in a cool, well-ventilated area where away from incompatible materials and |
| | ignition sources. Keep away from oxidizing agents, strong alkali, strong acids. |
| | Ideal storage temperature range is 25 – 30 gC. DO NOT freeze this products. |
| | No smoking and prevent unauthorized access. |
| | Containers which are opened must be carefully resealed and kept upright to prevent leakage. |
| | DO NOT allow to enter drains or watercourses. |
| | |

8. EXPOSURE CONTROLS AND PERSONAL PROTECTION

Engineering controls

: Provide adequate ventilation. Where reasonably practicable this should be achieved by the use of local exhaust ventilation and good general extraction. If these are not sufficient to maintain concentrations of particulates below the Occupational Exposure Limit (OEL), suitable respiratory protection must be worn.

| onal protective equipment | |
|---------------------------|--|
| Respiratory system | : If workers are exposed to concentrations above the exposure limit they must use appropriate |
| | certified respirators. Use respiratory mask with charcoal and dust filter when spraying |
| | this product (as filter combination A2-P2). In confined spaces use compressed air or fresh air |
| | respiratory equipment. When use of roller or brush, consider use of charcoal filter (A2). |
| Skin and body | : Wear anti-static clothing made of natural fibre or high temperature resistant synthetic fibre. |
| | Before rewearing, wash the contaminated suit separately from other laundry. |
| Hands | : For prolonged or repeated handling, use gloves: neoprene or nitrile gloves. |
| | Use barrier cream together with the gloves to protect the exposed areas of the skin. |
| | However, prohibit to use the barrier cream after exposure has occurred. |
| | For right choice of glove materials, with focus on chemical resistance and time of penetration, |
| | seek advice by the supplier of chemical resistant gloves. |
| Eyes | : Use safety eyewear designed to protect against splash of liquids. |
